

THE BOOK OF GROWTH

The 30-Day Engineering Manual for High-Velocity Customer Acquisition, Activation, Retention & Scaled Monetization

"গ্রোথ হ্যাকিং কোনো শর্টকাট, ভেল্কিবাজি বা স্প্যামিং না। এটা হলো গভীর সহানুভূতি (Empathy), ডেটা-চালিত বৈজ্ঞানিক পরীক্ষণ (Scientific Experimentation), এবং সিস্টেম ইঞ্জিনিয়ারিং। উপার্জনের দায়বদ্ধতা কিন্তু দুনিয়া এবং আখেরাতে—তাই ব্যবসা হতে হবে নৈতিক এবং মূল্যবোধসম্পন্ন।"

— মাহমুদুল হাসান সোহাগ (প্রতিষ্ঠাতা, রকমারি.কম ও অন্যরকম গ্রুপ)

PROLOGUE: THE PHILOSOPHY OF SHOHAG VAI

Mahmudul Hasan Sohag's 12-part *Uddokta Masterclass* (উদ্যোক্তা মাস্টারক্লাস: গ্রোথ হ্যাকিং) redefines how entrepreneurs, founders, and growth engineers approach company scale. Grounded in over two decades of building enduring institutions in Bangladesh—including **Rokomari.com** (the nation's premier online book platform), **Udvash Academic Care** (উদ্ভাস), and **OnnoRokom Software**—his syllabus strips away the vanity of traditional corporate advertising and replaces it with relentless customer-centric engineering.

The 7 Non-Negotiable Pillars Taught by Shohag Vai:

- 1. The "Doer Attitude" (ডুয়ার এটিচিউড):** "একটা জিনিস জানা এক জিনিস, ইমপ্লিমেন্ট করা ভিন্ন স্কিল। ইমপ্লিমেন্টেশন ডিসিপ্লিনের ওপর নির্ভর করে। ডুয়ার এটিচিউড হলো—যতটুকু শিখছি, সাথে সাথে করে ফেলি।"
- 2. Efficiency over Deception (ইফিশিয়েন্সি বনাম ডেপ্‌লি বার্জি):** Hacking does not mean sneaky loopholes or fraud. It means maximizing throughput, minimizing waste, and engineering compounding growth using empirical data.
- 3. Value Wars Over Price Wars (ভ্যালু যুদ্ধ বনাম প্রাইস যুদ্ধ):** Competing on price attracts the highest-churn customers and leads to corporate bankruptcy. Win by delivering differentiated, irreplaceable value.
- 4. Plugging the Leaky Bucket First (ছিদ্রযুক্ত বালতি মেরামত):** Spending marketing budget on customer acquisition when your existing customers are quietly churning is financial suicide. Retention and customer happiness always come before acquisition.
- 5. The Physician's Stance (ডাক্তারের মতো পরামর্শমূলক বিক্রয়):** Never pitch features like an irresponsible peddler pushing unneeded pills. Diagnose the customer's operational agony first, calculate the cost of inaction, and only then prescribe the cure.
- 6. Internal Harmony Precedes External Excellence (ঘরের মানুষকে আগে সন্তুষ্ট করুন):** Quoting Rabindranath Tagore ("ঘর হতে শুধু দুই পা ফেলিয়া..."), frontline employees cannot deliver a 10-star experience if their own internal Net Promoter Score is broken.
- 7. Ethical Commerce & Moral Accountability (নেতিক উপার্জনের দায়বদ্ধতা):** Every revenue stream must be accounted for before your conscience and in the hereafter. Never manipulate, never deceive, and never sell a product to someone who does not need it.

TABLE OF CONTENTS & CURRICULUM ROADMAP

A structured 30-day operational masterclass dividing the growth engine into 4 disciplined weekly sprints and a final scaling capstone:

WEEK 1: Days 01–07

Mindset, Validation, Pre-Selling & MVP

The 4 growth myths, Sean Ellis 40% PMF test, CricPol pre-selling model, Car rental & School MVPs, High-tempo testing (≥ 3 /wk), and ICE scoring.

WEEK 2: Days 08–14

Activation, Friction Removal & Habits

The "Aha! Moment", Rokomari's "Look Inside" case study, Houston Airport carousel psychology, 6 levers of activation, and the Endowed Progress Effect.

WEEK 3: Days 15–21

Retention, Churn Forensics & NPS

The Leaky Bucket dilemma, 4 pillars of retention, 0–10 NPS formula, Rabindranath Tagore poem & Internal Employee NPS, and master churn questions.

WEEK 4: Days 22–28

SPIN Selling, Pricing & Virality

The Physician vs. Peddler mindset, SPIN sales diagnostic matrix, overcoming the 4 objections, Decoy Effect, 5 levels of referral, and shareable moments.

DAYS 29–30: CAPSTONE & THE OPERATING MACHINE

The Complete AARRR Growth Machine & The High-Velocity Manifesto

Synthesizing Acquisition, Activation, Retention, Revenue, and Referral into a self-reinforcing enterprise flywheel grounded in ethical commercial responsibility.

PAGE 1: THE ESSENTIAL GROWTH LIBRARY

Before executing a single growth sprint, every team member must be grounded in the foundational literature that underpins modern digital growth, behavioral psychology, and enterprise sales. These 8 canonical masterworks and 1 operational playbook form the theoretical bedrock of the next 30 days:

1. Hacking Growth

Sean Ellis & Morgan Brown

PRIMARY SYLLABUS TEXTBOOK (EPISODES 1–12)

The definitive operating manual for modern digital growth. Sean Ellis coined the term "Growth Hacking." Teaches the **40% PMF Test**, **High-Tempo Testing** (≥ 3 tests/week), **ICE Prioritization**, and the **AARRR Pirate Funnel**.

2. The Lean Startup

Eric Ries

VALIDATED LEARNING & MVP FOUNDATION (EPISODES 1 & 3)

Eliminates the greatest waste in entrepreneurship: building products nobody wants. Introduces the **Build-Measure-Learn** feedback loop and the **Minimum Viable Product (MVP)**, grounding Shohag vai's pre-selling framework.

3. SPIN Selling

Neil Rackham

HIGH-TICKET CONSULTATIVE CLOSING (EPISODE 9)

Based on 35,000+ sales calls over 12 years. Proves feature pitching turns buyers away. Outlines the 4-stage diagnostic sequence: **Situation**, **Problem**, **Implication** (cost of inaction), and **Need-Payoff** (client calculates ROI).

4. Predictably Irrational

Dan Ariely

BEHAVIORAL ECONOMICS & PRICING STRATEGY (EPISODE 10)

Proves human buyers are systematically irrational. Details the **Decoy Effect (Asymmetric Dominance)**, price anchoring, and downselling architectures that protect profit margins while saving lost leads.

5. The Ultimate Question 2.0

Fred Reichheld (Bain & Company)

RETENTION ANALYTICS & NET PROMOTER SCORE (EPISODE 6)

Establishes the gold-standard 0-10 **Net Promoter Score (NPS)**. Introduced alongside Shohag vai's **Internal Employee NPS**: frontline customer experience cannot sustainably exceed internal team happiness.

6. Influence: The Psychology of Persuasion

Dr. Robert B. Cialdini

ACTIVATION & CONVERSION LEVERS (EPISODES 8, 10 & 11)

The 7 universal psychological levers: Reciprocity, Commitment & Consistency, Social Proof, Authority, Liking, Scarcity, and Unity. Powers the **Endowed Progress Effect** and trust architectures.

7. Contagious: Why Things Catch On

Jonah Berger

VIRAL LOOPS & REFERRAL ARCHITECTURE (EPISODES 11 & 12)

The scientific **STEPPS** framework: Social Currency, Triggers, Emotion, Public, Practical Value, Stories. Outlines how to achieve a viral coefficient **$K > 1.0$** by capturing high-emotion shareable moments.

8. Hooked: How to Build Habit-Forming Products

Nir Eyal

FRICTIONLESS ACTIVATION & HABIT LOOPS (EPISODES 7 & 8)

The 4-stage habit loop: **Trigger** → **Action** → **Variable Reward** → **Investment**. Guides Time-to-Value (TTV) compression and habituation without ongoing ad spend.

9. How I Created Growth Hacking Plans

Happy Aladdin

OPERATIONAL FIELD HANDBOOK (EPISODES 1, 5 & 8)

Shohag vai's live reference playbook containing 70+ growth frameworks and 300+ battle-tested tactical experiments used during high-cadence sprint planning.

WEEK 1: MINDSET, VALIDATION, PRE-SELLING & MVP ENGINEERING

Day 1: Growth Hacking vs. Traditional Vanity Marketing

[Ep 01: 01:31–18:24]

Foundational Text: *Hacking Growth* (Sean Ellis)

Growth Hacking is not a magic trick or sneaky shortcut (ভেল্কিবাজি বা চোরাবুদ্ধি নয়); it is the fusion of engineering, data analysis, and user empathy to maximize operational efficiency. Traditional corporations spend huge budgets renting 5-star hotel ballrooms and placing full-page newspaper ads. Did Facebook, Uber, or WhatsApp ever hold a lavish launching ceremony? Nobody knows when or where they launched because their growth was engineered directly into the software.

Shohag Vai's 4 Growth Hacking Myths:

- **Myth 1 — Product Cloning:** Buying a \$2,000 clone script of Facebook or Uber will never make you successful. Features are trivial; operations, data loops, and execution culture are everything.
- **Myth 2 — The First-Mover Fallacy:** Pioneers spend millions educating a reluctant market (MySpace, Yahoo, Lyft). Smart second-movers study their friction and capture the market. "তালী-চাবি বেচতে গেলে মানুষকে বোঝাতে হয় না তালী কী। কিন্তু এমন অচেনা জিনিস আনলে মানুষকে বোঝাতেই কোম্পানি দেউলিয়া হয়ে যাবে!"
- **Myth 3 — The Biryani Metaphor:** Business has no single magic secret. Biryani requires prime meat, exact spice ratios, correct cooking sequence, salt balance, and someone remembering to light the stove! Growth is compounding hundreds of small tweaks.
- **Myth 4 — Growth Hacking without PMF:** Scaling marketing before Product-Market Fit is like "মৃত প্রার্থীর পক্ষে নির্বাচনী প্রচারণা চালানো" (campaigning for a deceased candidate).

The Comb Salesman Fraud: Selling a comb to a bald person (যার মাথায় চুল নাই তার কাছে চিরুনি বেচা) is deceptive traditional marketing. Growth Hacking solves real, acute human problems ethically.

[] **Daily Action Item:** Audit your acquisition channels. Classify all current marketing efforts into "Vanity" (likes, traffic) vs. "Growth Engines" (activated leads, verified conversions). Kill one vanity activity today.

Day 2: The Sean Ellis 40% PMF Test

[Ep 01: 20:00–23:25]

Foundational Text: *Hacking Growth* (Sean Ellis)

Before spending capital on growth, you must mathematically verify Product–Market Fit. Never ask friends, relatives, or investors—they will flatter you to be polite.

The Sean Ellis PMF Survey Question:

"How would you feel if you could no longer use [Product/Service] tomorrow?"

A) Very disappointed | B) Somewhat disappointed | C) Not disappointed | D) N/A – No longer use it

The Benchmark: If $\geq 40\%$ answer **"Very disappointed"**, you have PMF. If $< 40\%$, stop all ad spend immediately. You are still in the customer discovery phase.

[] Daily Action Item: Deploy the 1–question survey to your last 30–50 customers. Tabulate the percentage of "Very disappointed" responses. If below 40%, interview those respondents to discover what is missing.

Day 3: Pre-Selling Before Building (The CricPol Case Study)

[Ep 01: 35:17–37:40 & Ep 02]

Foundational Text: *The Lean Startup* (Eric Ries)

The standard trap of technical founders: they spend 6 to 12 months writing backend code in secret, only to launch to total silence. Shohag vai's golden rule: *"Validate demand by selling before building."*

The CricPol (ক্রিকপোল) Story: During Bangladesh's cricket craze, Shohag vai wanted to build a live SMS cricket score service. Instead of spending months building complex telecom integrations, he created a paper mockup on cardboard and pitched corporate sponsors. He secured a 35 Lakh BDT sponsorship commitment upfront from Qubee before writing a single line of backend software!

Cash vs. Polite Words: "টাকা যতক্ষণ পকেট থেকে বের করতে না পারবা, ততক্ষণ ওটা স্রেফ মুখের কথা! বাংলাদেশে মানুষ মুখের ওপর না করতে পারে না, তাই বলে 'আইডিয়া দারুণ ভাই, আগাও!' পরে কেউ পাশে থাকে না। মুখের কথায় চিড়া ভিজে না, ক্যাশ টাকা চাই!"

The 4-Step Validation Email Sequence:

1. *Email 1:* Pinpoint sharpest agony (*"What is the most painful problem you want to solve most?"*).
2. *Email 2:* Discover common mistakes (*"What is the most popular mistake people make trying to solve this?"*).
3. *Email 3:* Propose tailored solution (*"What if we resolved this friction entirely?"*).
4. *Email 4:* Pre-sell with early-bird commitment (*"I will build this if 50 people pre-order at a 50% discount. If we don't reach 50, 100% of money is refunded!"*).

[] Daily Action Item: Create a 1-page offer sheet for your next feature or service. Present it to 5 target clients. If none offer a deposit or pre-order, pivot or kill the idea.

Day 4: Minimum Viable Product (MVP) & Constraint Isolation

[Ep 03: 01:18–19:29]

Foundational Text: *The Lean Startup* (Eric Ries)

An MVP is NOT a broken product; it is the simplest artifact that allows maximum validated learning with minimal capital. Always isolate the single riskiest bottleneck:

The Car Rental Case Study: To launch a rent-a-car business, the amateur thinks: *"I need 50 lakh taka to buy 3 minibuses, rent a garage, and hire drivers."* Shohag vai asks: What is your true bottleneck? It is NOT owning cars; it is acquiring paying passengers! Borrow or broker one car from another agency and fulfill trips at cost. First prove you can consistently acquire customers.

The School / Coaching Center Case Study (Udvash Context): Don't lease a multi-story building to start a school. Isolate the bottleneck: if teacher quality is the bottleneck → start a Teacher Training Academy first. If student acquisition is the bottleneck → start an Education Marketing Agency first.

QC vs. QA (The Hoodie Manufacturing Lesson): End-of-line Quality Checking cannot stop losses. You must install Quality Assurance checkpoints at every step: fabric inspection, cutting, sewing, and printing.

[] Daily Action Item: Strip your current offering down to its single core constraint. Design a test to validate that single assumption within 48 hours.

Day 5: High-Tempo Testing & The 3-Experiment Cadence

[Ep 02: 36:20–39:35]

Foundational Text: *Hacking Growth* (Sean Ellis)

Growth velocity is a mathematical outcome of testing frequency. *"তুমি যখন গ্রোথ হ্যাকিং বুঝতে চাইবা, মাথার মধ্যে দুইটা শব্দ চুকাবে—ডাটা এবং টেস্ট! ডাটা ছাড়া গ্রোথ হ্যাকিং হবে না।"* Fast-growing startups maintain a disciplined cadence of running at least 3 experiments every single week.

The Scientific Experiment Hypothesis:

"By implementing [Change X], we expect [Metric Y] to improve by [Z%] because [Psychological Reason]."

[] Daily Action Item: Set up a shared Growth Experiment Sheet with 5 columns: Hypothesis, Test Variant, Target Metric, Owner, and Result. Launch your first test today.

Day 6: The ICE Prioritization Framework

[Ep 03: 21:22–25:10]

Foundational Text: *Hacking Growth* & *Happy Aladdin's Playbook*

Teams constantly generate 50 different growth ideas. Use the objective ICE scoring model (1 to 10 scale):

ICE Score = (Impact + Confidence + Ease) / 3

- **Impact (1–10):** How profoundly does this move the core North Star Metric?
- **Confidence (1–10):** How certain are we based on empirical data or benchmarks?
- **Ease (1–10):** How quickly can we ship without custom engineering? (10 = 2 hours; 1 = 2 months).

[] **Daily Action Item:** Score your backlog of 10 marketing ideas using the ICE rubric. Reorder the list; select the top 2 for immediate execution.

Day 7: Weekly Sprint Review & Retrospective

[Ep 03]

Foundational Text: *Hacking Growth* & *The Lean Startup*

Institutional learning is the only sustainable competitive advantage. Hold a 45-minute retrospective every week: (1) Review test outcomes, (2) Document learnings in the growth repository, (3) Re-score backlog with ICE, and (4) Commit to the next sprint's 3 experiments.

[] **Daily Action Item:** Complete your first Week 1 Retrospective. Archive winning variants, eliminate what failed, and lock in Week 2 sprint tasks.

WEEK 2: USER ACTIVATION, FRICTION ELIMINATION & HABIT DESIGN

Day 8: Defining Activation & The "Aha! Moment"

[Ep 07: 03:20–29:54]

Foundational Text: *Hacking Growth* (Ellis) & *Hooked* (Eyal)

Traffic without Activation is useless. Activation is the magical threshold where a new visitor experiences the core emotional benefit of your product for the first time: the **"Aha! Moment"** (বা "ওয়াও মোমেন্ট").

Global Activation Benchmarks:

- *Facebook*: Connecting with 7 friends within 10 days.
- *Twitter (X)*: Following 30 active accounts.
- *Dropbox*: Uploading 1 file to the desktop folder and seeing the green checkmark.

The Rokomari "একটু পড়ে দেখুন" (Look Inside) Case Study: In Bangladesh, readers were deeply skeptical about ordering books online without flipping through the pages in Nilkhet or Banglabazar. Rokomari scanned the table of contents and first 10–15 pages of every book so readers could browse online free. This single activation feature exploded reader trust and surged orders nationwide.

The Udvash Free Masterclass: Students never understood teaching pedagogy from flyers; sitting in one free masterclass delivered the immediate "Aha!" revelation.

[] Daily Action Item: Map your product journey. What is the exact equivalent of Rokomari's "একটু পড়ে দেখুন" for your service? How can you deliver that realization in under 60 seconds?

Day 9: The 6 Levers of Activation & The Houston Airport Carousel

[Ep 05: 45:00 & Ep 08]

Foundational Text: *Influence* (Cialdini) & *Hooked* (Eyal)

Shohag vai breaks activation engineering down into 6 actionable levers: (1) Reduce Friction, (2) Guide the User, (3) Personalize Journey, (4) Trust Boosters, (5) Progress Signals, and (6) Trigger Emotion.

The Houston Airport Baggage Carousel Analogy: Passengers complained bitterly about long waits at the baggage carousel. Speeding up the mechanical belt failed. Engineers moved the arrival gate further away, forcing a 6-minute walk through the terminal. Luggage still took 8 minutes, but passengers now walked 6 minutes and waited only 2 minutes! Complaints dropped to zero! *Lesson: Perceived friction and idle waiting time ruin customer experience. Keep the user moving and engaged.*

The Celebrity Marketing Fallacy: Paying 10 Lakh BDT to a celebrity is a trap. You then have to spend 50 Lakh BDT on media distribution, and if the product lacks an organic "Aha!" moment, the business still fails.

[] **Daily Action Item:** Audit your onboarding flow on mobile. Count form fields and clicks. Eliminate at least 2 non-critical fields today.

Day 10: Eliminating Signup Drag & Guest Checkout

[Ep 08: 02:24–19:20]

Foundational Text: *Influence* & *Hooked*

Forcing a user to create an account, verify a 6-digit PIN, and remember passwords before seeing value drops conversion by 10%–15% per added field. When Rokomari observed that rural or elderly customers struggled with passwords, they introduced simple phone OTP login and phone-order hotlines.

[] **Daily Action Item:** Review your signup flow. Eliminate password confirmation and non-critical fields. Allow social login, guest checkout, or single-field phone/email registration.

Day 11: The Endowed Progress Effect & Micro-Commitments

[Ep 08: 48:17–50:09]

Foundational Text: *Influence* (Cialdini)

People are twice as motivated to finish a journey if they feel they have already started. In classic car-wash loyalty experiments, cards requiring 8 stamps with 0 stamped showed 19% completion. Cards requiring 10 stamps with 2 *pre-stamped* yielded **34% completion** (nearly double!). Never show a progress bar at 0%; show it pre-filled to 20% or 25% for starting.

[] **Daily Action Item:** Redesign your onboarding progress bar or form stepper. Give new users immediate credit for starting, displaying an initial progress state of 20%–25%.

Day 12: Trust Architecture: Overcoming "No Trust"

[Ep 08: 35:17 & Ep 09]

Foundational Text: *Influence* (Cialdini)

In online commerce, customer distrust is the default state ("আদৌ কি সার্ভিস ঠিকমতো পাবে? টাকা মার যাবে না তো?"). Construct impenetrable trust using: (1) Specific verifiable numbers ("Over 120,000 orders across 64 districts"), (2) Customer proof with full names and photos, (3) Risk reversal (Money-back guarantee, Cash-on-Delivery), and (4) Clear phone support.

[] Daily Action Item: Inspect your landing page above the fold. Ensure at least three distinct trust markers (verifiable metrics, integration badges, testimonials, or phone support) are clearly visible without scrolling.

Day 13: Time-to-Value (TTV) Compression

[Ep 07 & Ep 08]

Foundational Text: *Hacking Growth* (Ellis)

Time-to-Value (TTV) is the clock ticking between a user's first click and their first taste of actual utility. If TTV is measured in days, 80% of users abandon. Pre-load sample data so software dashboards look alive on Day 1. Confirm lead capture with an automated audio preview within 60 seconds.

[] Daily Action Item: Measure your onboarding Time-to-Value in minutes. Brainstorm one mechanism to cut that time in half (e.g., automated instant preview vs. waiting for a manual onboarding call).

Day 14: Mid-Point Sprint Review: Auditing Activation

[Ep 08]

Foundational Text: *Hacking Growth* & *Aladdin's Playbook*

Take stock of your activation funnel before moving into retention and monetization. Measure: Visitor-to-Lead conversion rate, Lead-to-Activated user rate ($\geq 40\%$), and pinpoint drop-offs between steps.

[] Daily Action Item: Calculate your activation rate for the past 14 days. Identify the single biggest step where users drop off, and design an experiment for next week to plug that drop.

WEEK 3: RETENTION ENGINEERING, CHURN FORENSICS & NET PROMOTER SCORE

Day 15: The Leaky Bucket: Why Retention Trumps Acquisition

[Ep 05: 22:25–27:19]

Foundational Text: *Hacking Growth* (Ellis)

Pouring expensive advertising budget into a product with low retention is financial suicide. Retaining an existing customer costs 5 to 7 times less than acquiring a new one.

The Metaphor of the Leaky Bucket (ছিদ্রযুক্ত বালতির গল্প): Imagine you have a water bucket full of holes. Instead of fixing the holes, you run to the pond, pump more water, and pour it into the top as fast as possible. You will exhaust all your energy, burn all your capital, and eventually collapse. Retention curves must flatten out into a horizontal plateau. If your retention curve continuously slides toward zero, you do not have a viable business.

[] Daily Action Item: Plot your monthly retention cohorts. What percentage of users who joined 3 months ago are still actively using your service? If that line trends to zero, freeze all paid ads.

Day 16: The 4 Pillars of Retention Engineering

[Ep 05: 28:15–49:09]

Foundational Text: Mahmudul Hasan Sohag & *Happy Aladdin's Playbook*

Retention is engineered by answering four diagnostic questions:

1. **Pillar 1 — Happiness Escalation:** How can we dramatically increase customer delight and relief?
2. **Pillar 2 — Subtle Dissatisfaction Removal:** Where are customers tolerating minor delays or confusion without complaining?
3. **Pillar 3 — Unaddressed Adjacent Friction:** What happens immediately before or after our service that still causes headaches?
4. **Pillar 4 — Making the Customer Heroic:** How can our product make our client earn more money or look heroic to their boss?

Fostering an Idea Culture [07:05–11:40]: "Stupid ideas are also important ideas!" Never punish employees for unconventional suggestions.

[] Daily Action Item: Select 2 long-term clients and conduct a 15-minute feedback interview using these 4 exact questions. Document their verbatim responses.

Day 17: Mastering Net Promoter Score (NPS)

[Ep 06: 01:15–11:10]

Foundational Text: *The Ultimate Question 2.0* (Fred Reichheld)

Complex 20-question surveys are ignored. Use the gold-standard question on a 0–10 scale: "How likely are you to recommend us to a friend or colleague?"

NPS = % Promoters (9–10) – % Detractors (0–6)

(Passives scoring 7–8 count toward total respondents but yield 0 net points).

- NPS > +50: Excellent organic loyalty.
- NPS > +70: World-class devotion (Apple, Tesla, Rokomari).

The Detractor Question: "চান্দু, জাস্ট আমাকে একটা বিষয় বলুন—কী এমন করতে পারতাম যা করলে আপনি আমাকে ৯ বা ১০ দিতেন?"

[] **Daily Action Item:** Deploy an automated NPS survey triggered 14 days after a customer joins or makes a purchase.

Day 18: Internal Employee NPS & The Rabindranath Tagore Lesson

[Ep 06: 11:14–14:15]

Foundational Text: *The Ultimate Question 2.0*

Frontline customer support and engineering teams cannot deliver a 10-star experience if their own internal morale is depressed.

The Poem Metaphor (রবীন্দ্রনাথ ঠাকুরের কবিতার শিক্ষা): Shohag vai quotes Rabindranath Tagore [13:42–13:58]:

"দেখা হয় নাই চক্ষু মেলিয়া / ঘর হতে শুধু দুই পা ফেলিয়া / একটি ধানের শিষের উপরে / একটি শিশির বিন্দু।"

Entrepreneurs travel around the globe looking for distant growth secrets and external marketing hacks—while completely ignoring the human beings working two steps away inside their own office!

[] **Daily Action Item:** Run an anonymous 1-question Internal NPS survey for your team. Review comments without defensiveness and fix the top internal grievance.

Day 19: Churn Forensics: The Master Churn Question

[Ep 06: 14:30–22:05]

Foundational Text: *Hacking Growth* & Sohag Masterclass

When customers leave, asking "*Why are you leaving?*" gets you polite, useless answers ("Budget cuts"). Use Shohag vai's diagnostic pair:

Shohag Vai's Master Churn Questions:

1. "*Think back carefully: What was the exact first moment or interaction that made you contemplate leaving us?*" (Uncovers the real root trigger).
2. "*Why didn't you leave even sooner? What kept you holding on?*" (Uncovers your strongest surviving value proposition).

[] **Daily Action Item:** Reach out personally to your last 3 churned customers using this diagnostic framing. Find the exact initial moment their trust eroded.

Day 20: Red Flag Metrics & Under-Promise, Over-Deliver

[Ep 06: 22:12–35:38]

Foundational Text: *The Ultimate Question 2.0*

Churn leaves red flags weeks in advance: login frequency drops from daily to weekly, feature usage declines > 30%, or reporting emails go unopened. Counter this with the Under-Promise, Over-Deliver rule: If onboarding takes 24 hours, promise 48 hours and deliver in 18 hours. Expectations are exceeded, creating emotional devotion.

[] **Daily Action Item:** Set up an automated CRM alert that pings your team whenever an active account hasn't logged in or utilized core features for 7 consecutive days.

Day 21: Week 3 Sprint Review: Plugging the Leaks

[Ep 06]

Foundational Text: *Hacking Growth*

Consolidate your retention dashboard: active NPS distribution, churn root causes, and red-flag intervention protocols.

[] **Daily Action Item:** Review churn forensics with engineering and customer success. Ship one product or workflow fix that eliminates the top churn trigger identified this week.

WEEK 4: CONSULTATIVE SELLING (SPIN), BEHAVIORAL PRICING & VIRALITY

Day 22: Consultative Selling: The Physician Mindset

[Ep 09: 00:00–25:00]

Foundational Text: *SPIN Selling* (Neil Rackham)

Amateur salespeople talk 80% of the time, opening 40–slide decks to boast about features. Elite closers speak only 25% of the time and listen 75% of the time.

The Irresponsible Doctor Analogy: Imagine you walk into a clinic with a stomach ache. The doctor immediately stands up, pulls a blue tablet from his pocket, and says: *"Look at this wonderful tablet! Made with German nanotechnology, 500mg potency, won an award in Switzerland! Take 3 a day!"* You would run away in terror. He didn't ask where it hurts or check your pulse. Yet 95% of salespeople do this exact crazy thing! Elite closers diagnose before they prescribe.

[] **Daily Action Item:** Record your next sales demonstration or outreach call. Measure your talk–time ratio. If you spoke for more than 35% of the conversation, rewrite your sales dialogue.

Day 23: The SPIN Selling Matrix in Action

[Ep 09: 25:00–48:00]

Foundational Text: *SPIN Selling* (Neil Rackham)

The four-stage consultative questioning sequence:

Stage	Diagnostic Purpose	Scripted Example
1. Situation (পরিস্থিতি)	Gather current operational facts	<i>"What tools or staff are you currently using to handle after-hours inbound customer calls?"</i>
2. Problem (সমস্যা)	Uncover latent dissatisfaction	<i>"How often do weekend calls or midnight inquiries slip to voicemail?"</i>
3. Implication (প্রভাব/ক্ষতি)	Escalate the financial cost of inaction	<i>"If 5 high-intent seller leads go to voicemail each month and call a competitor, what does that cost your brokerage in annual lost GCI?"</i>
4. Need–Payoff (সমাধানের লাভ)	Guide client to calculate their own ROI	<i>"If an AI voice agent answered every after-hours lead in sub-800ms and booked showings, what would that do for your profit?"</i>

[] **Daily Action Item:** Script 2 Situation, 2 Problem, 2 Implication, and 2 Need–Payoff questions tailored to your target industry. Practice delivering them cleanly.

Day 24: Dismantling the 4 Objections & Ethical Commerce

[Ep 09: 48:00–56:06]

Foundational Text: *SPIN Selling & Influence*

Every commercial hesitation boils down to four barriers:

- **"No Need" (প্রয়োজন নেই):** Failed on Implication questions. Deepen the cost-of-inaction analysis until the latent agony is visible.
- **"No Money / Too Expensive" (টাকা নেই বা বেশি দাম):** Reframe cost as ROI. A \$2,500 setup recovering one \$15,000 deal pays for itself 6x over on day one. Break large sums into daily coffee units (\$5/day).
- **"No Hurry" (তাড়া নেই):** Highlight compounding daily cost of delay (leaking 3 deals/week to competitors).
- **"No Trust" (বিশ্বাস নেই):** Provide verifiable case studies, live voice demos, and zero-risk pilot covenants.

Akhirah Accountability (নৈতিক উপার্জনের দায়বদ্ধতা): "হাশরের ময়দানে আয়ের উৎস ও ব্যয়ের হিসাব দিতে হবে।

Remember that every dollar you earn must be accounted for before your conscience and in the hereafter.

Never manipulate, never deceive, and never sell a product to someone who genuinely does not need it."

[] Daily Action Item: Write down your standard objection-handling response for each of the 4 universal barriers. Roleplay them with your sales team.

Day 25: Behavioral Pricing Architecture & The Decoy Effect

[Ep 10: 00:00–35:00]

Foundational Text: *Predictably Irrational* (Dan Ariely)

Compete on value, never on price. Winning on price attracts bargain hunters who churn the moment someone undercuts you by 1 dollar.

The Decoy Effect (ডিকয় ইফেক্ট — Asymmetric Dominance):

- *Movie Popcorn Example*: Small popcorn is 30 Tk, Large popcorn is 90 Tk. If you introduce a Medium popcorn at 80 Tk (the Decoy), customers think: "For only 10 Tk more, I get the giant Large!" Almost everyone buys the 90 Tk popcorn!
- *Dan Ariely's The Economist Experiment*: Web \$59, Print \$125, Print+Web \$125. Removing the decoy Print-only option crashed revenue by 43%.
- *Downselling [23:14–25:45]*: When a prospect refuses a \$2,500 enterprise setup, don't let them walk away with nothing. Downsell them to a \$497 starter kit to convert an otherwise lost lead into a paying customer.
- *Positioning Honesty [00:51]*: Never fake company history ("বাপের বয়স যোগ করে দেওয়া—যে আমাদের ১০ বছরের অভিজ্ঞতা! [হাসি]").

[] **Daily Action Item**: Redesign your pricing page. Create a 3-tier structure (Starter, Growth, Scale) with a high-value anchor that makes the target tier the obvious choice.

Day 26: The Virality Equation & Viral Coefficient (K)

[Ep 11: 00:00–22:00]

Foundational Text: *Hacking Growth & Contagious*

Virality is not luck or social media dancing; it is pure mathematics: $K = i \times c$ (where i = invites sent per user, c = conversion rate per invite). If $K > 1.0$, you experience exponential organic virality without ad spend. If $0 < K < 1.0$, viral amplification lowers your blended CAC.

[] **Daily Action Item**: Calculate your current referral viral coefficient (K). Track how many invitations active clients send and what percentage convert.

Day 27: The 5 Levels of Referral Architecture

[Ep 11: 22:00–40:02]

Foundational Text: *Contagious* (Berger) & *Hacking Growth*

The 5-tier referral maturity ladder:

- **Level 1 — The Direct Beg (সরাসরি চাওয়া):** Sales rep asks: *"Do you know anyone who needs this?"* (Nearly zero conversion).
- **Level 2 — Visible Social Proof (সামাজিক প্রমাণ):** Badges and signatures ("Powered by Minions AI", "Sent from my iPhone").
- **Level 3 — One-Sided Rewards (একপাক্ষিক সুবিধা):** *"Refer a colleague, get \$50."* (Feels transactional, like selling out friends).
- **Level 4 — Two-Sided Win-Win Rewards (উভয়মুখী জয়):** The Dropbox Playbook. *"Give 500MB free storage to your friend, and you get 500MB too."* Both sides win!
- **Level 5 — Identity & Status Advocacy (আইডেন্টিটি ও মর্যাদা):** Brand devotion where recommending the product elevates social standing. (Udvash never paid 1 taka in referral commissions, but generated millions of organic enrollments because recommending Udvash stood for academic prestige and student pride).

[] **Daily Action Item:** Replace any one-sided referral offer with a Level 4 two-sided win-win incentive.

Day 28: Designing Shareable Moments & Social Currency

[Ep 12: 01:27–24:19]

Foundational Text: *Contagious: Why Things Catch On* (Jonah Berger)

Solicit reviews and referrals only during peak emotional highs:

Timing the Ask [03:51–05:54]: Never ask for a referral when a Zoom call drops! The perfect time to ask an Udvash parent for a referral is the day their child comes home smiling with an outstanding exam result! ("যেদিন বাচ্চা পরীক্ষায় খারাপ করবে বা মার খেয়ে আসবে, সেদিন রেফারেল চাইলে কি হবে? উল্টো মার খেতে হবে! [হাসি]").

Creative Low-Cost Rewards:

- *1-Taka Delivery Charge at Rokomari [07:53]:* People are numb to "Free." But "১ টাকার ডেলিভারি চার্জ" sounded astonishing and went viral nationwide!
- *Custom Metal Bookmarkers [10:24]:* Rokomari gifted 5–6 Tk engraved metallic bookmarkers to readers. Readers held them with immense pride, posting photos: "আমি বই পড়ি, আমি হেজিভেজি লোক না!"

The 5 Social Currency Triggers [01:27]: People share when it signals: "*I am Smart*", "*I am Helpful*", "*I am Successful*", "*I am Caring*", or *Exclusivity*.

The 95% vs. 5% Rule [21:05]: 95 out of 100 people will never refer anyone. Only 5% are natural advocates. Identify and shower love on that 5%. (OnnoRokom Pathshala scaled to millions with zero ad spend through pure organic sharing).

[] Daily Action Item: Identify the single highest emotional "peak moment" in your customer journey. Insert an automated referral prompt or review request at that exact instant.

DAYS 29–30: CAPSTONE & THE HIGH-VELOCITY OPERATING SYSTEM

Day 29: Synthesizing the AARRR Growth Machine

Foundational Text: All 9 Canonical Works & Aladdin Playbook

Growth is a cohesive system where every stage reinforces the next:

1. **Acquisition:** Validate real demand before spending, build high-ROI lead magnets, and secure pre-commitments (CricPol model).
2. **Activation:** Compress Time-to-Value, eliminate signup friction, and deliver the "Aha! moment" immediately (Rokomari "Look Inside").
3. **Retention:** Plug the leaky bucket, monitor 0–10 NPS, elevate Internal Employee NPS, and conduct forensic churn post-mortems.
4. **Revenue:** Consultative SPIN Selling, physician-grade diagnoses, dismantle the 4 objections, and deploy behavioral decoy pricing.
5. **Referral:** Engineer Level 4 two-sided referral loops ($K > 1$) and capture shareable moments.

[] **Daily Action Item:** Build a unified AARRR executive scorecard that displays your conversion rates across all 5 stages on a single dashboard screen.

Day 30: The High-Velocity Growth Manifesto

Final Synthesis & Operating Principles

The Growth Operating Manifesto:

- Growth is not magic; it is **engineering**.
- Always validate and pre-sell before writing code.
- Never pour capital into a leaky bucket—retention comes first.
- Take care of your internal team so they take care of your customers.
- Diagnose like a doctor; never pitch like a reckless peddler.
- Compete on value, never on price.
- Run at least 3 rigorous growth experiments every week.
- Build with ethical responsibility, knowing you are accountable for every interaction.
- The business that learns and iterates fastest wins the market.

[] **Execution Covenant:** Sign and commit to running 3 high-tempo growth experiments every week for the next 12 months.

MASTER CURRICULUM PROGRESSION MATRIX

Week	Focus Phase	Core Literature	Key Case Study / Analogy	Primary Metric	Weekly Deliverable
Week 1	Foundations, PMF & MVP	<i>Hacking Growth, The Lean Startup</i>	CricPol SMS Mockup, Car Rental MVP, Biryani Analogy	PMF % (≥ 40%)	Validated Offer & ICE Sprint Backlog
Week 2	Activation & Friction Removal	<i>Hooked, Influence</i>	Rokomari "Look Inside", Houston Airport Carousel	Activation Rate (≥ 40%)	Sub-60s TTV & Endowed Onboarding Funnel
Week 3	Retention & Churn Forensics	<i>The Ultimate Question 2.0, Hacking Growth</i>	The Leaky Bucket, Tagore Poem & Internal NPS	NPS (≥ +50) & Cohort Curve	Churn Forensic Script & Red Flag System
Week 4	SPIN Sales, Pricing & Virality	<i>SPIN Selling, Predictably Irrational, Contagious</i>	Doctor vs Salesman, Decoy Popcorn, 1-Tk Delivery & Metal Bookmarker	Close Rate & Viral K-Factor	SPIN Sales Playbook & Two-Sided Referral Loop
Final	Scaled Execution Machine	All 9 Canonical Texts & Aladdin Playbook	Rokomari, Udvash & OnnoRokom Enterprise Flywheel	Blended LTV / CAC Ratio	Automated High-Tempo Growth Engine
